1. Myspace

After log-in to Linshare, When you select Myspace on the left menu, you will be redirected to your personal space:

To upload a new file, you have 2 choices:

- Click on the + button on the upper left side.
- Drag and drop your file from your file browser to your own space (you can then see the centre circle become blue).

When an uploaded file is hovered, 3 icons appear on the right side. From left, those icons mean:

- Display file's infos.
- Share the file with other users (internal or external, refer to Share).
- Download the file.

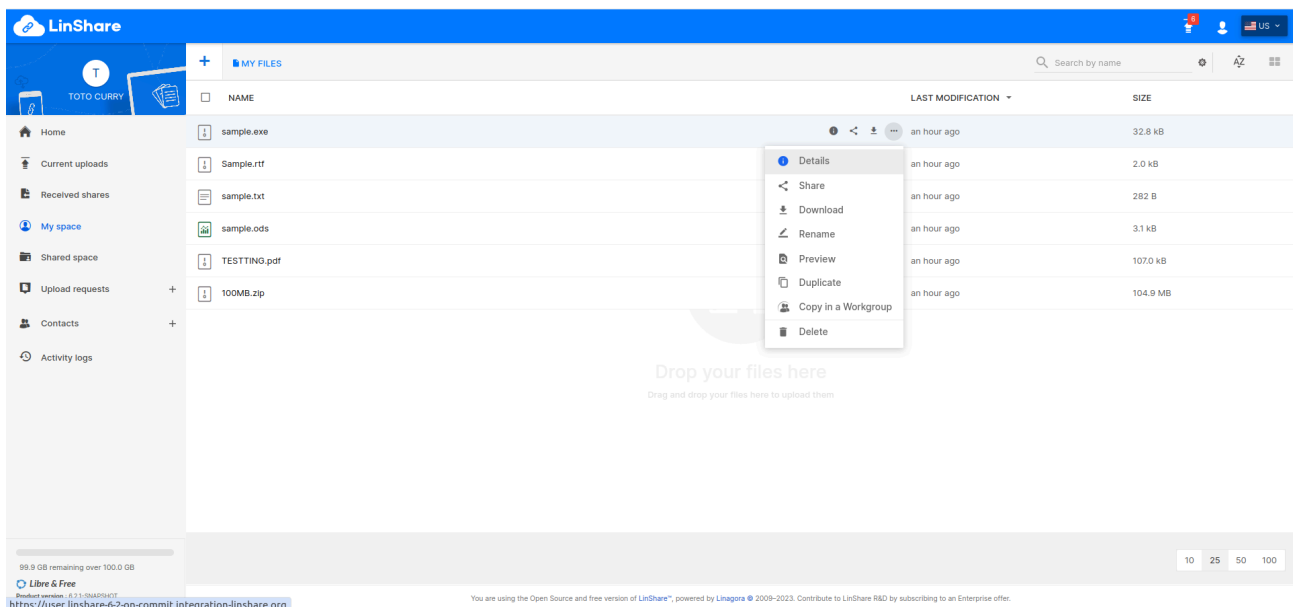

When click on 3-dots button of a file, other options are:

- Rename

- Preview
- Duplicate
- Copy in a workgroup
- Delete

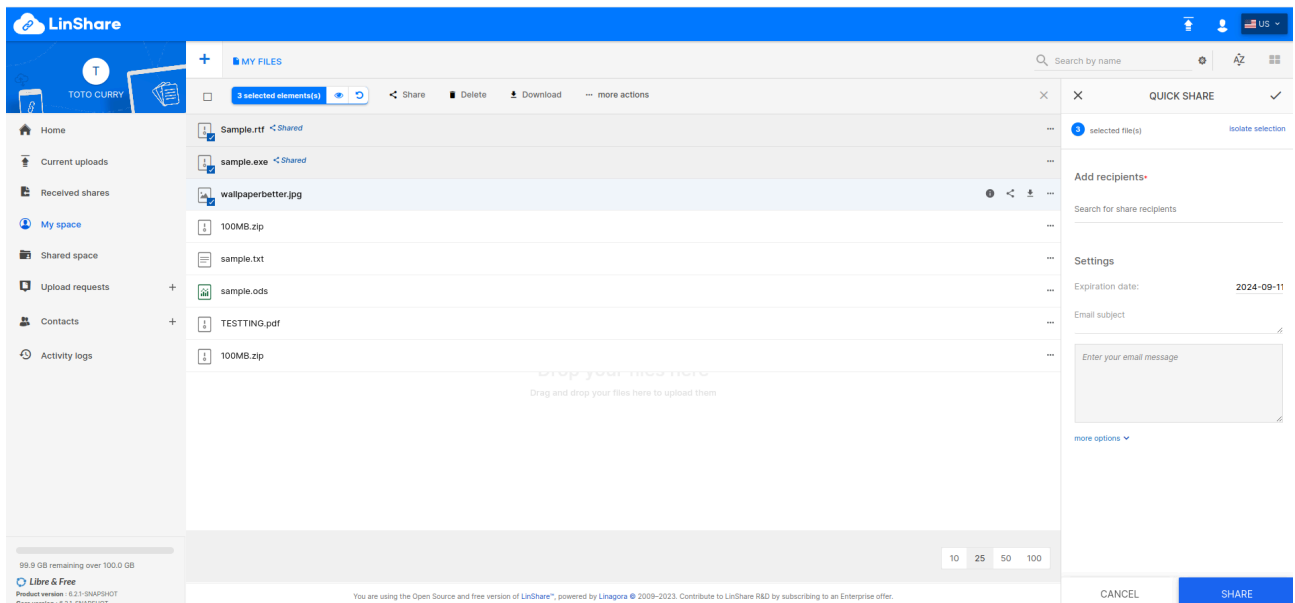

1.1. Share operation

To Share a file, you can select Share icon when hovering that file or select option “Share” from option list when click 3-dot button of the file:

To share multiple files, you can select checkbox of files then click option:”Share” on action bar at top of screen

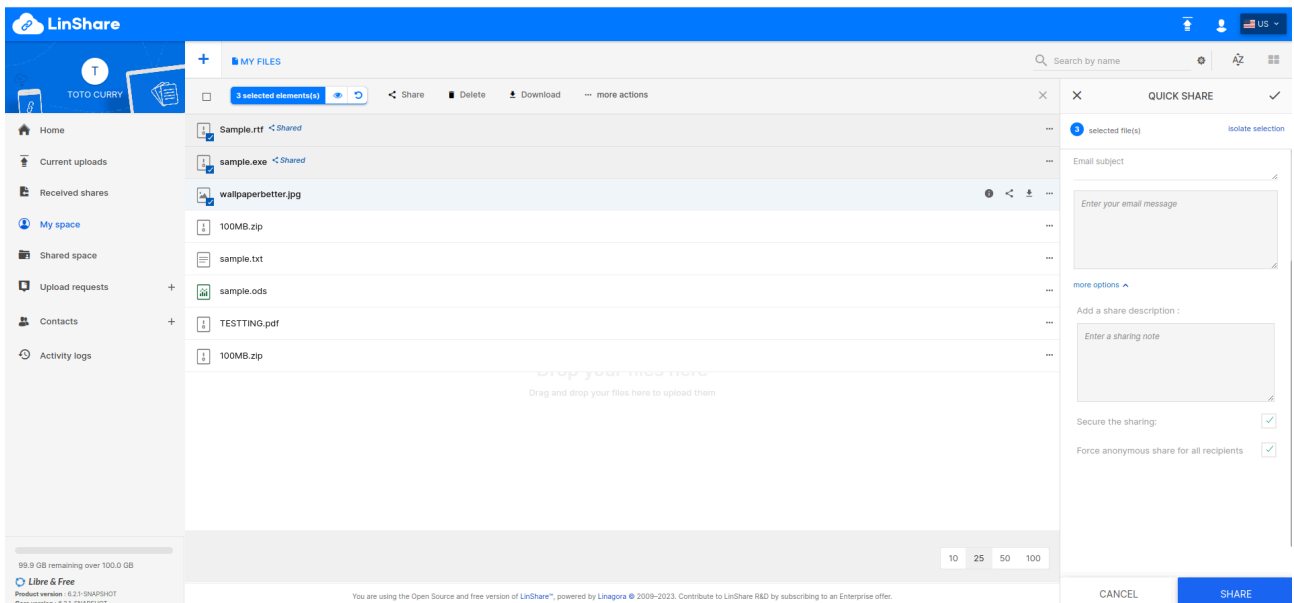

A Share creation form will be displayed on the right panel:

In this share form, I can see the fields:

- Add recipients: Mandatory field. You can input your recipient's emails to this field. You can share files with internal users and external users.
- Email subject, Email message
- Expiration date:
 - 🕒 This field can be enabled/disabled by admin.
 - 🕒 Default value is set by admin
 - 🕒 You can change this date or not depending on the admin's configuration.
- When you click "more options", the advanced settings will be unfolded:
 - 🕒 Add a share description
 - 🕒 Secure the sharing: If you select this checkbox, and if the receiver is an external user, he will receive an email with a link to shared files and a password. When he clicks in the link, he need to input password before accessing the shared files.
 - 🕒 Force anonymous share for all recipients: When this checkbox is not selected, an internal recipient can see the shared files in the Received shared on left menu. When this checkbox is selected, the internal users will

receive the share link in email with an anonymous URL like external users.

After input all information and click Share button, the files will be shared and there will be a successful notification message

Each shared file (which is not past the expiration date) is labeled "*shared*".

When you View Details of a shared file, then select tab "Shares", You can see the list of recipients. You can see each recipient downloaded shared file or not

- When you click on one recipient, you can see the detail of share:
- You can click the button Cancel to withdraw the share to that recipient. He will not be able to access the shared file.

2. Shared space

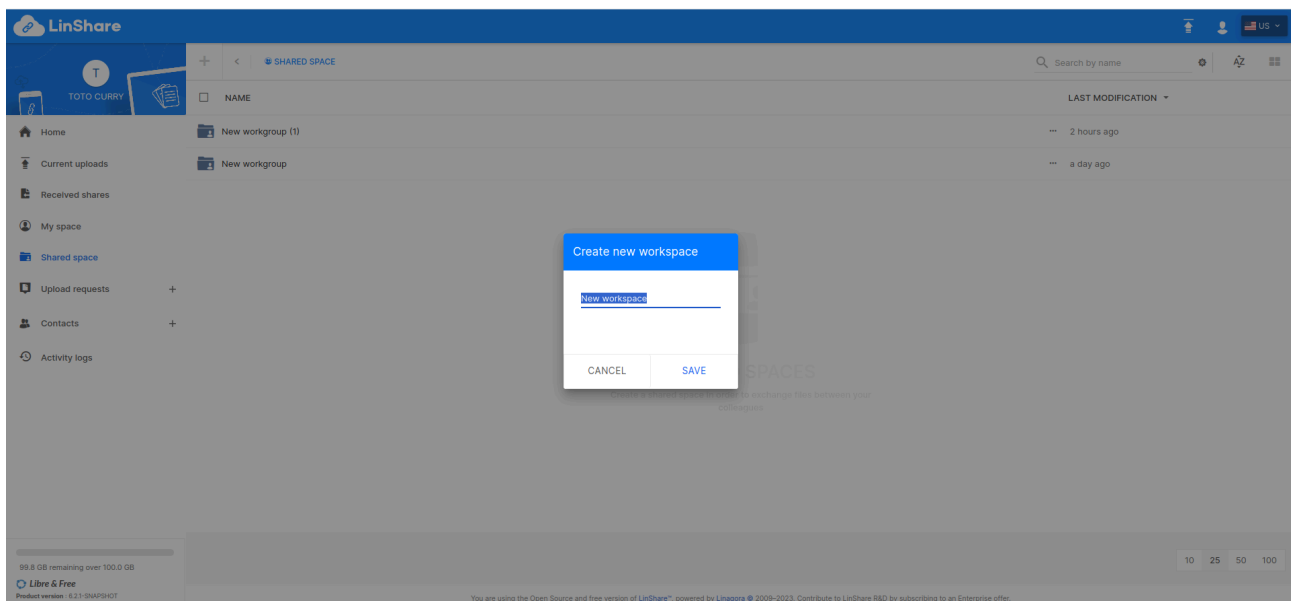

Shared space includes Workspaces and workgroups. Those are sharing areas in which other internal users or guests can see, upload/download files.

A workspace contains workgroups. A workgroup contains files and folder

2.1 Create workspace/workgroup

To create a workspace, click on “+” button then select option “Workspace”, then input name => click Save button

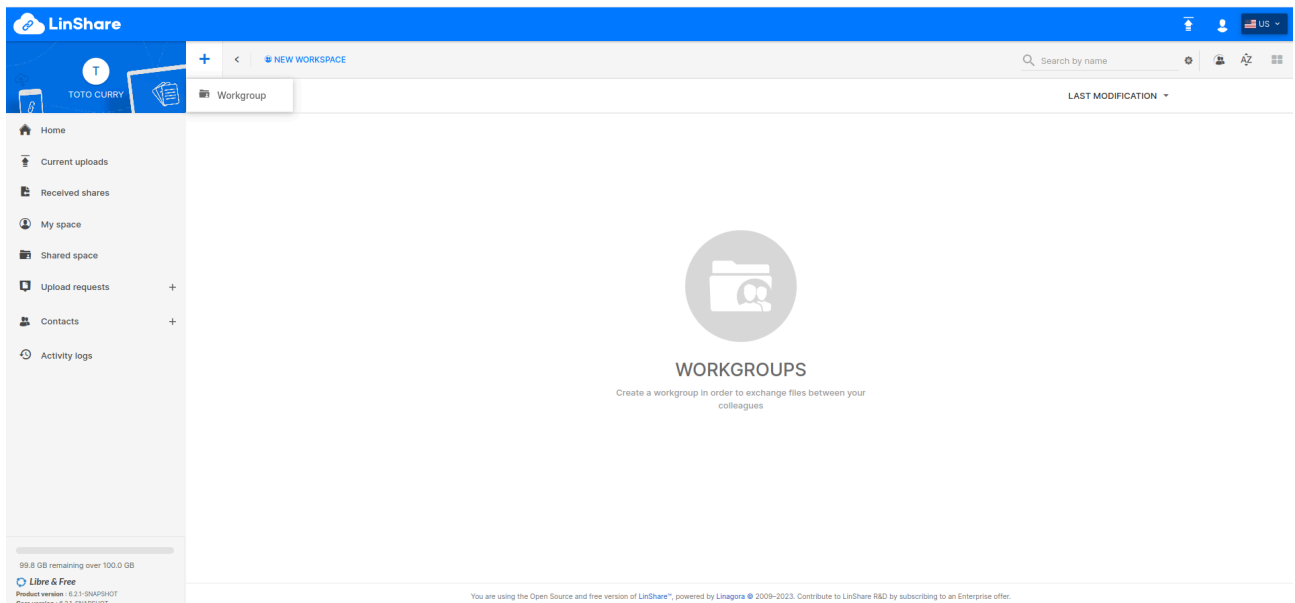

For workgroup, you can create a standalone workgroup or create a workgroup inside a workspace

To create a standalone workgroup, click the “+” button then select the option Workgroup.

To create a workgroup inside workspace, open that workspace then click the “+” button

2.2. Members and permission

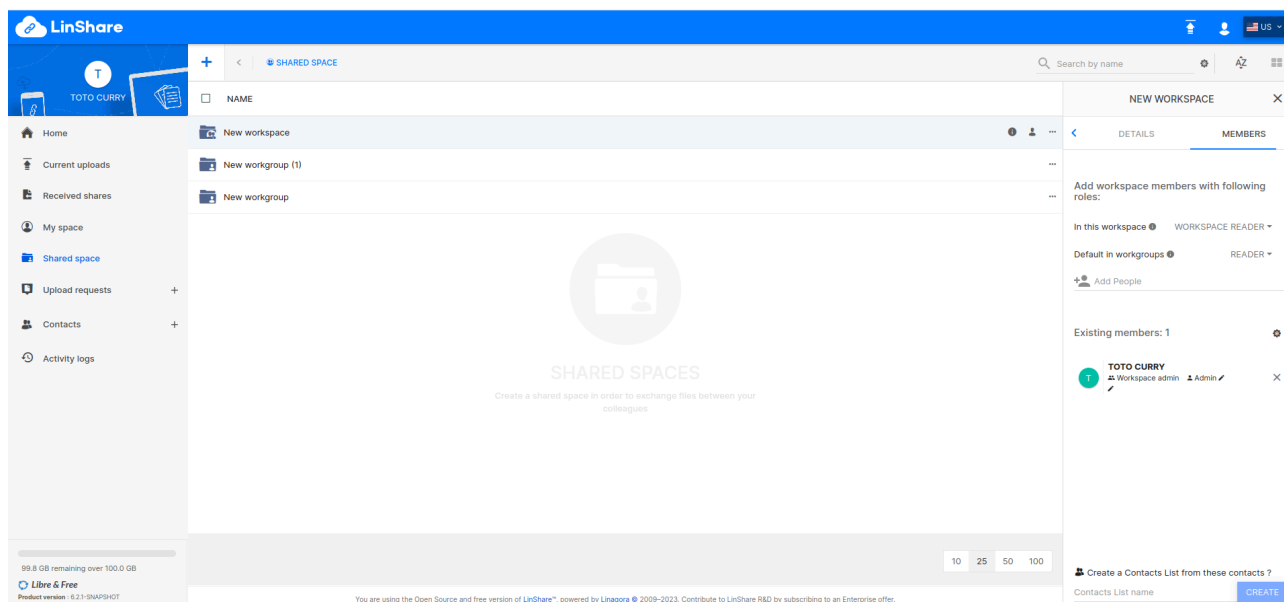

Among a workspace, a member has two roles, one role dedicated to the workspace by itself. A second one which will be his role by default in workgroups created inside that workspace.

The workgroup members inside a workspace inherit from the default workgroup roles.

The author of workspace/workgroup is assigned admin role by default.

To add member to a workspace, you need to have Admin role to that workspace:

- Hoover the workspace name and click on the human icon.
- Or click 3-dots button of a workspace then select option: “Add a member”
- A sidebar appears on the right side, from there you can add members with specifying roles to the workspace and role to the workgroups inside:
 - Workspace role: Reader/Writer/Admin
 - Default workgroup’s role: Reader/Contributor/Writer/Admin

To add member to a workgroup, you need to have Admin role to that workspace. 2 options are available to do so:

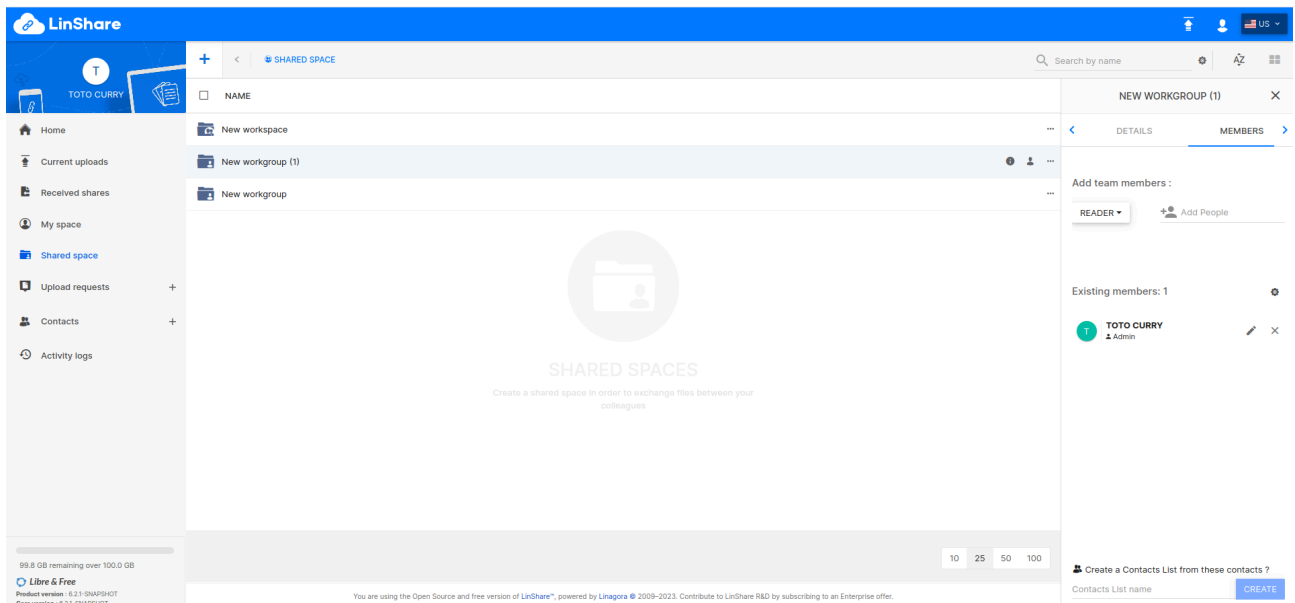

- Come inside the workgroup (by clicking on it), then use the + button to find the menu entry "Member".
- Hoover the workgroup name and click on the human icon.
- A sidebar appears on the right side, from there you can add members with specifying their rights in the group: Reader/Contributor/Writer/Admin

After a member is added to a workspace/workgroup, the user will see those workspace/workgroups in his Shared space list with his permission

LinShare introduced role access management in workspace and workgroups. Refer to the tables below to see the link between permissions and roles.

Permission	Workspace Reader	Workspace Writer	Workspace Admin	Workgroup Reader	Workgroup Contributor	Workgroup Writer	Workgroup Admin
See member of the workspace	X	X	X				

Add member to the workspace			X				
Update member on the workspace			X				
Delete Member on the workspace			X				
Update The workspace			X				
Delete the workspace			X				
Add a workgroup		X	X				
Update a Workgroup		X	X				
Delete a Workgroup		X	X				
Add member to the Workgroup							X
Delete Member on the Workgroup							X
Update member on the Workgroup							X
See the documents				X	X	X	X
Download a document				X	X	X	X
Upload Document					X	X	X
Delete a document						X	X

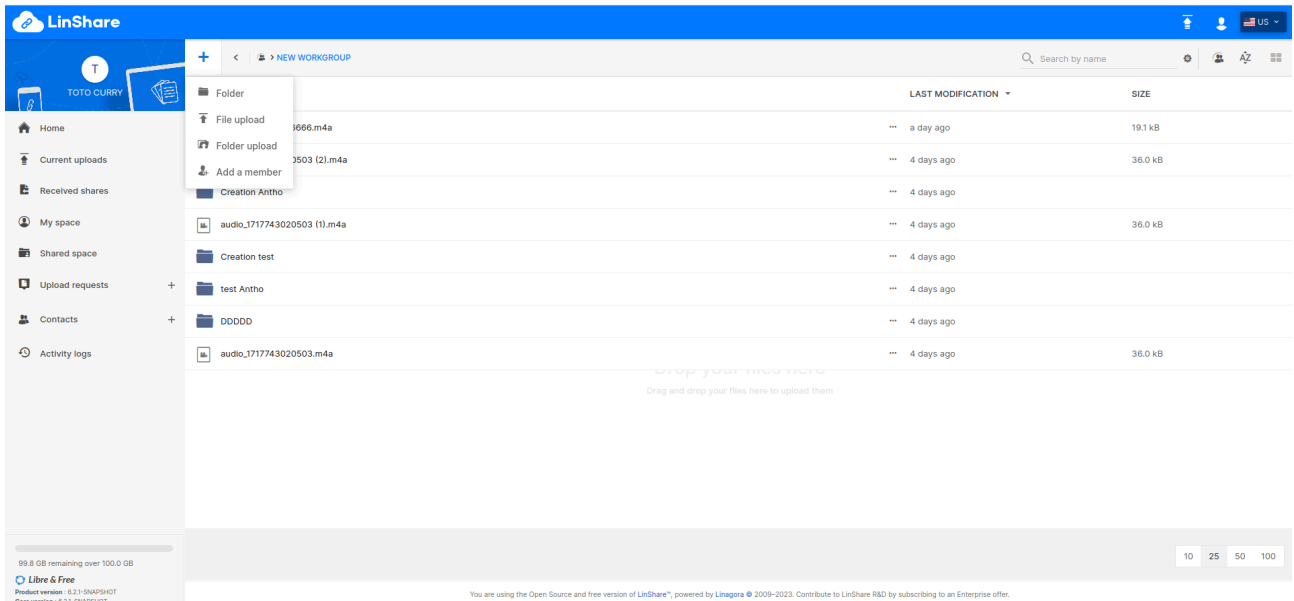

2.3 Files and folders

When you access to a workgroup, then click “+” button, you can see options:

- Create folder
- Upload files
- Upload folder
- Add a member

It is possible to create a whole folder tree within a workgroup.

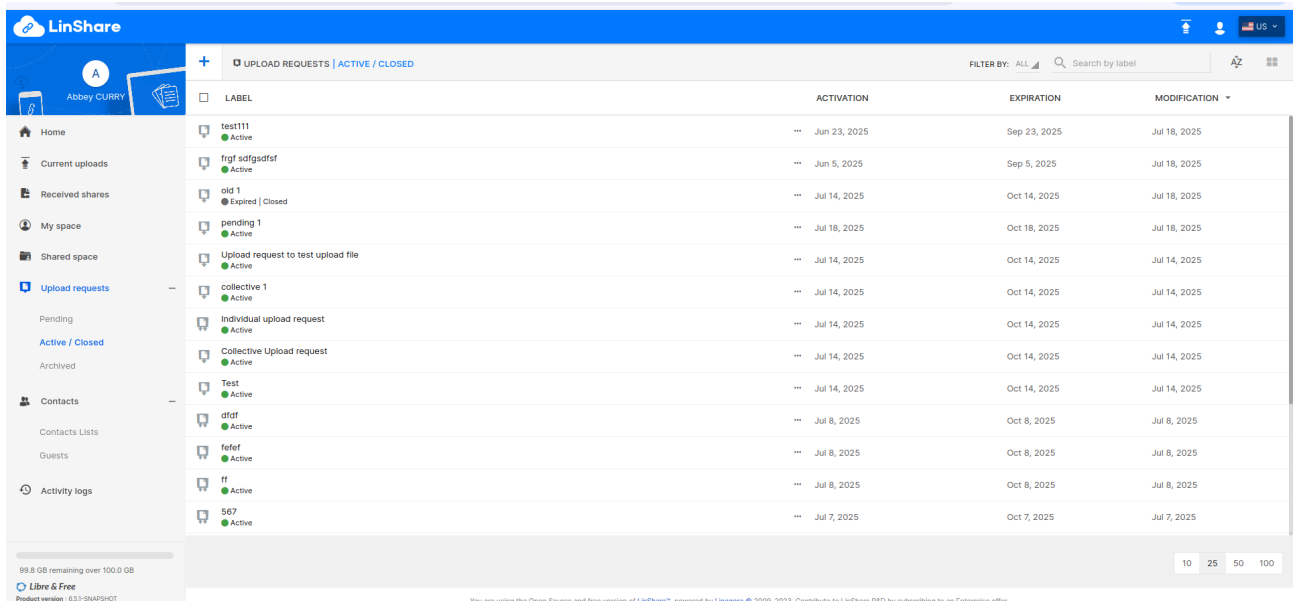

3. Upload request

An upload request is a feature through which a person (email) can upload files for a LinShare user, in a temporary and regulated manner. The uploaded documents will impact the issuer's personal space quota

When you go to Upload request section on the left menu, there are 3-subcategories:

- Pending: contains pending Upload requests
- Active/Closed: contains active or closed upload requests
- Archive: contains archived upload request

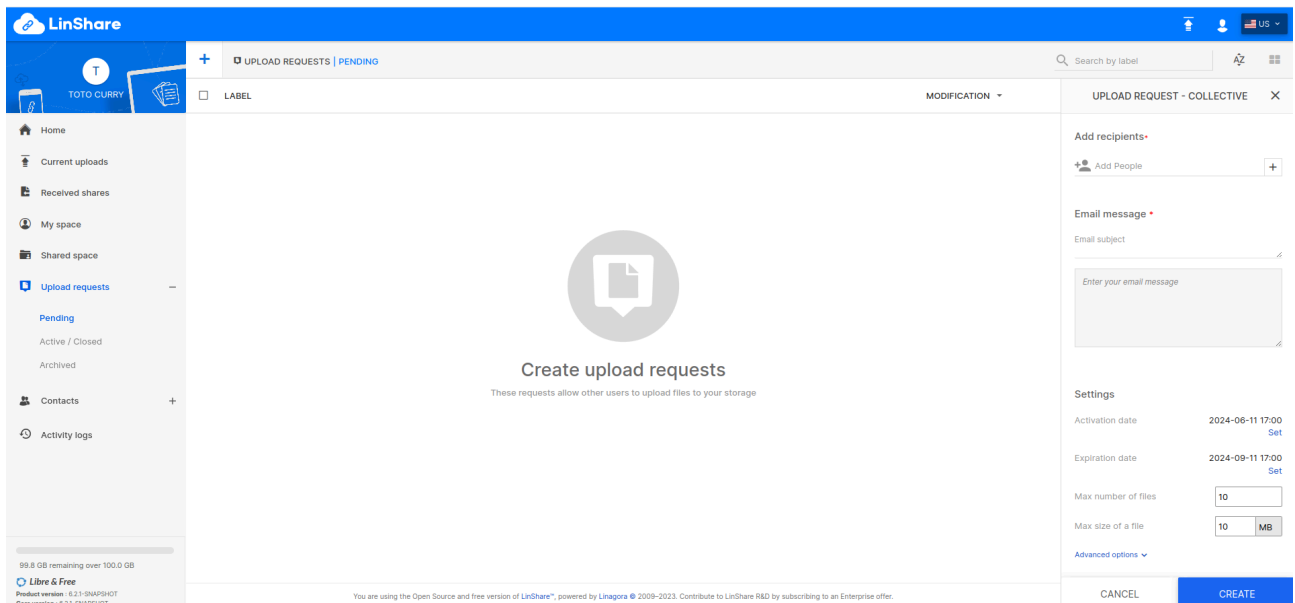

LABEL	ACTIVATION	EXPIRATION	MODIFICATION
test111 Active	Jun 23, 2025	Sep 23, 2025	Jul 18, 2025
frgr sdfgsdfsf Active	Jun 5, 2025	Sep 5, 2025	Jul 18, 2025

fefef Active	Jul 8, 2025	Oct 8, 2025	Jul 8, 2025
ff Active	Jul 8, 2025	Oct 8, 2025	Jul 8, 2025
567 Active	Jul 7, 2025	Oct 7, 2025	Jul 7, 2025

3.1 Create an upload request

There are 2 types of upload requests:

- Collective upload request:: The recipients share the upload and can thus see the other members' documents.
- Individual upload request:: Each recipient has their own personal upload space which the other members don't have access to.

When You click the symbol “+” and choose type of upload request, the system opens a right panel that allow me to input the upload request information as below:

- The recipients (Required): Recipients can be internal or external emails.
- Subject (Required)
- Email message (Optional)
- Activation date and Expiry date: Default value is configured by domain admin. You can change this value or not depending on the admin's configuration
- Total size of files/ Max number of files/Max size of a file: The default value and the maximum value are defined by the domain admin . You can change this value upon admin setting but cannot exceed the maximum value set by admin

When You clicks Advance option, the system open Advanced option panel including following fields:

The screenshot shows the LinShare web interface. The top navigation bar includes the LinShare logo and a user profile icon. The sidebar on the left contains navigation links: Home, Current uploads, Received shares, My space, Shared space, Upload requests, Pending, Active / Closed, Archived, Contacts, and Activity logs. The main content area is titled 'Create upload requests' and features a large circular icon with a document. Below the icon, it says 'These requests allow other users to upload files to your storage'. On the right side, a 'Settings' panel is open, displaying various configuration options for an upload request. The settings include: Activation date (2024-06-11 17:00), Expiration date (2024-09-11 17:00), Max number of files (10), Max size of a file (10 MB), Advanced options (expanded), Reminder date (2024-09-04 17:00), Total size of files (500 MB), Password protected (checked), Allow deletion (checked), Allow closure (unchecked), and Notification language (English). At the bottom of the settings panel, there are 'CANCEL' and 'CREATE' buttons.

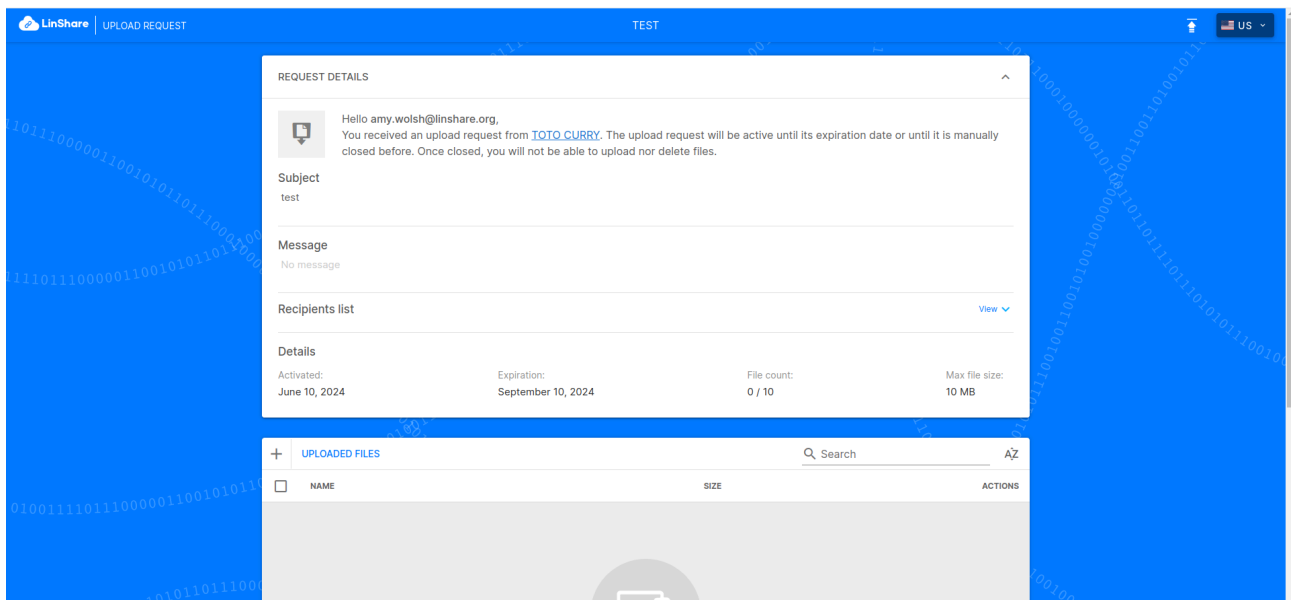

- **Reminder date:** This is the date that LinShare will send notification to remind recipients about expiry date of upload request. Default value is configured by domain admin. You can change this value or not depending on the admin's configuration
- **Password protected:** - a checkbox. If the box is checked, when the recipient receives the upload request via email, he will also be provided a password which is generated by the server, when he opens the URL, he is required to input this password.
- **Allow deletion** - a checkbox. If the box is checked, recipient is allowed to delete files in the upload request.
- **Allow closure:** - a checkbox. If the box is checked, recipient is allowed to close the upload request if it is active..
- **Notification language:** The default notification language is set by admin. You can change this field if the delegation policy allows.

After input the fields, and click button Create, The upload request is created

If The activation date time is not as same as creation date, this upload request has status "Pending".

At the activation date, the system will automatically activates the upload request by sending notification to the recipient and the status of request is changed to “Active”.

- This notification is an email containing a unique HTTPS link pointing towards a LinShare upload interface and indicating the conditions of use.
- This interface lets the recipient(s) upload one or multiple documents for the issuer.

The upload request is closed once the expiry date is reached, or by an action from the the issuer or the recipient, depending on the configuration of the upload request. The upload request remains available to everyone in read only mode.

The issuer can then archive the upload request, which is then moved to the issuer’s history and is no longer available to the recipient. During this process, the issuer has the option to copy all of the uploaded documents into their personal space or to delete them.

4. Received shares

NAME	CREATION DATE	EXPIRATION DATE	SIZE
859518.png Lisa SIMPSON	9 hours ago	In 3 months	18.9 kB
Gantt Chart.xml Amy WOLSH	9 hours ago	In 3 months	14.8 kB
Image 152.png Carl CARLSON	3 days ago	In 3 months	406.0 kB
walid.jpeg Amy WOLSH	6 days ago	In 3 months	8.8 kB

View your received shares
These shares are temporary file links, sent and hosted by your contacts.

99.8 GB remaining over 100.0 GB
Libre & Free

In this section, you can see all the files shared to you. You can View details, Copy to Myspace/Shared space, Download, Delete, Preview, Forward files in this list.

If the share is expired, the file will be removed from this list.

5. Contact lists

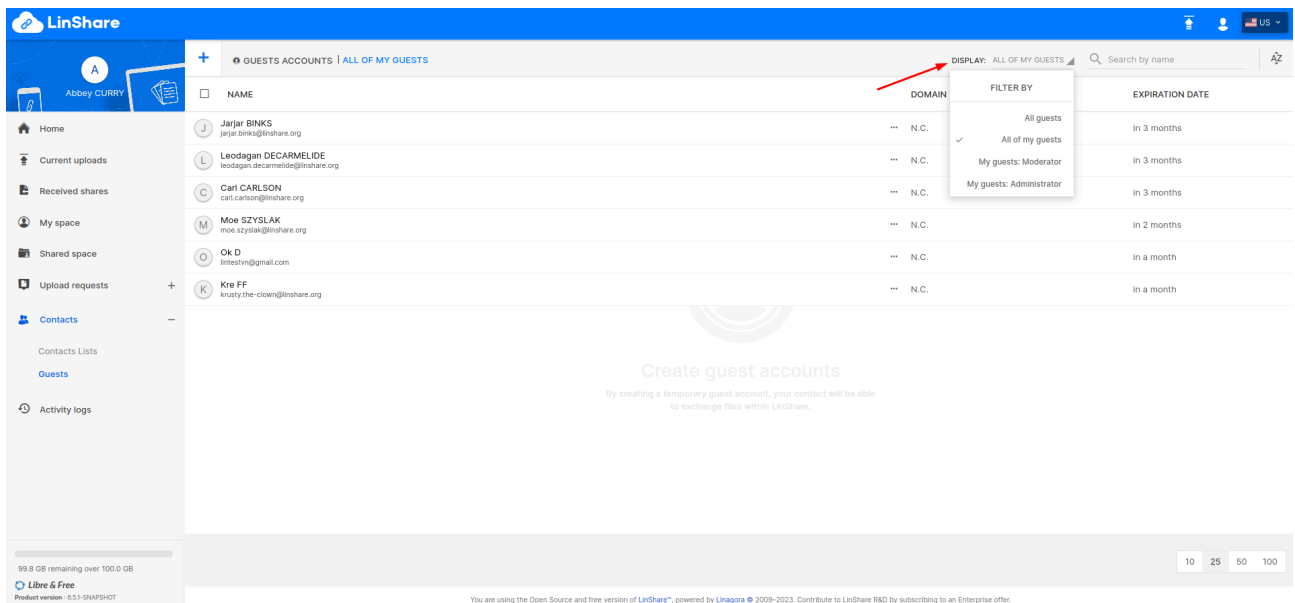

Click on the "+" button on the upper left corner to add a contact list. A list can be private or public (visible or invisible to the same domain users). To manage a contact list, simply use the icons that appear when the list is hovered.

You can also see other's public contact lists

6. Guest

Guests are special users. They are external users that, once added, can be treated like internal users: they can be added to a contact list, to a workgroup or you can even allow them to share files with you.

When you select Contact => Guests from left panel, the guests listing screen is displayed:

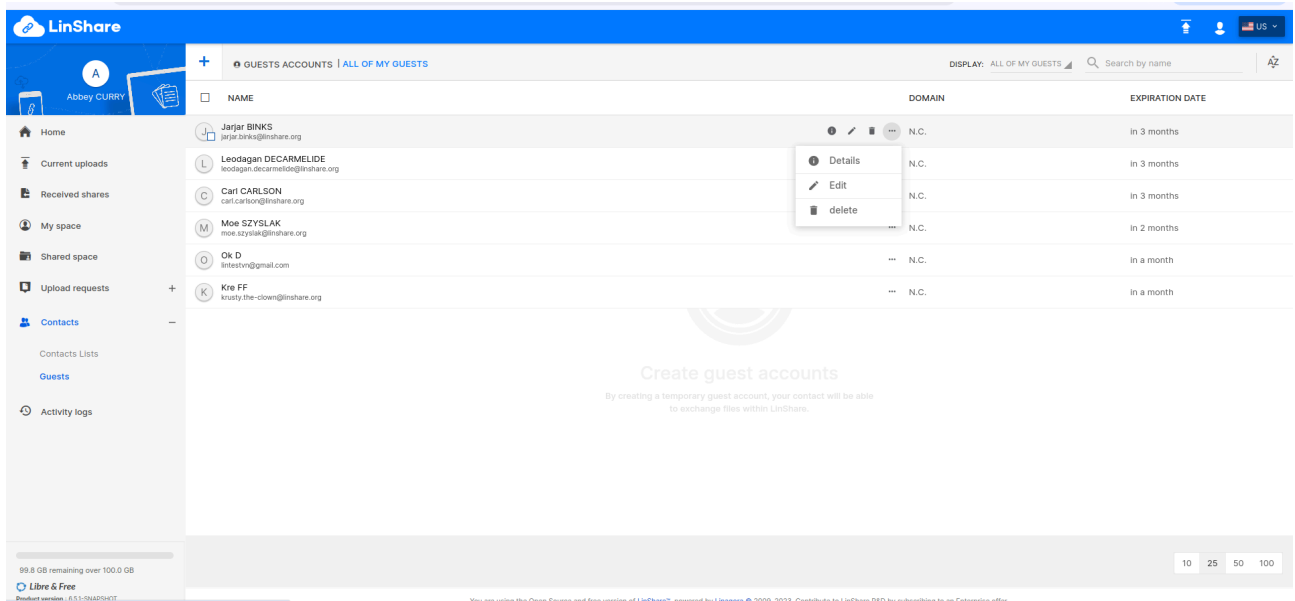

By default, it will show all of my guests, from the filter on the right corner, you can select to view:

- All guests: include my guests and other user's guests
- My guests: Moderators: Show the guests that I have moderator right with them
- My guests: Administrator: Show the guest that I have administrator right with them

When you hover or click 3-dot button of a guest that you have role "Administrator" on, you will see the list of actions:

- Details
- Edit
- Delete

When you hover or click 3-dot button of a guest that you have role “Moderator” on, you will see the list of actions:

- Details
- Edit

When you hover or click 3-dot button of a guest that you dont have any role on, you only see 1 option:

- Details

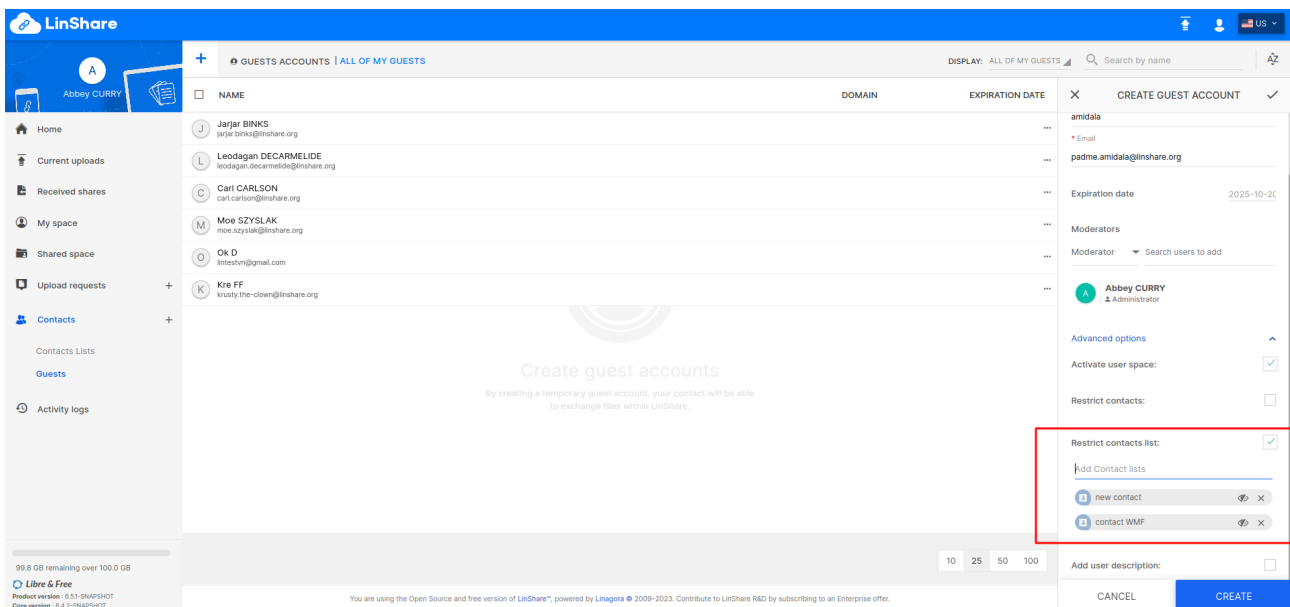

6.1. Create a new guest

1. Click the button :”+” on top left of the guest listing screen
2. Fill in the guest information in the left panel:
 - First name
 - Last name
 - Email
 - Expiration date
 - Moderator:
 - By default, you will be added as guest’s moderator

- I can add other users as moderators of this guest: Select role from the drop-down list: Moderator or administrator, then enter the user's email.
- When you click “Advanced options”, you can see other settings:
 - “Activate user space” checkbox: This allows the guest to access his Myspace or not
 - “Restricted contact” checkbox: This allows the creator to restrict guest’s files sharing only to a list of contacts. By default, the guest will be restricted to his creator
 - “Restricted contact list” checkbox: Same as “Restrict contact”, but instead of restricting the guest by individual contact, this allows to restrict the guest by lists of contact. After adding a contact list, you can see the icon open/close eye - which allows the guest to see members of this contact list or not. Depending on settings from the admin, you can change the contacts list members' visibility or not.
 - “Add user description” checkbox: This allow user to add description by a text field for this guest

3. Click “**Save**” button

4. A **success message** will confirm that the guest has been created and an invitation email has been sent to them.

If a guest is allowed to see the members of his restricted contact list:

- When the guest shares file(s) with restricted contact list, he can see the contact list

members in share details, activity logs and file's activity

If a guest is not allowed to see the members of his restricted contact list:

- When the guest shares file(s) with a restricted contact list, he only sees the contact list's name in share details, activity logs and file's activity, not the members.

6.2 View details of a guest

1. Hover or click the three-dot icon of the guest
2. Select **"Details"** from the dropdown menu.
3. A details panel or popup will display guest information, such as:
 - Name
 - Email
 - Domain
 - Creator
 - Creation date
 - Modification date
 - Expiration date
 - Description: If you are moderator or administrator of the guest, you can edit this field
 - Moderators list: If you are not moderator or administrator of the guest, you will not be able to see this list
 - Activate user space
 - Restrict contacts
 - Restrict contact lists

The screenshot shows the LinShare 'GUESTS ACCOUNTS' page. The main table lists guest accounts with columns for NAME, DOMAIN, and EXPIRATION DATE. A sidebar on the left provides navigation options. On the right, a detailed view for a specific guest account is displayed, showing meta data, restricted contacts, and available contacts.

NAME	DOMAIN	EXPIRATION DATE
Jarjar BINKS	jarjar.binksg@linshare.org	...
Padme AMIDALA	padme.amidala@linshare.org	...
Leodagan DECARMELIDE	leodagan.decarmelide@linshare.org	...

Available contacts list

- new contact
- contact WMF

6.3 Edit a guest

1. Hover or click the three-dot icon of the guest
2. Select **"Edit"** from the dropdown menu.
3. In the edit dialog, you can update:
 - First name
 - Last name
 - Expiration date
 - Moderators: If you are the administrator of the guest, you can add/remove/edit the moderators list of the guest. If you are the moderator of the guest, you can only see the moderators list
 - Activate user space
 - Restrict contacts
 - Restrict contact lists: You can add/remove contact lists, change the members' visibility (if allowed by admin setting)
 - User description
4. Click the **"Update"** button to apply changes. A **success message** will confirm the guest has been updated.

6.4 Delete guest (s)

1. To delete:

- **Single guest:**

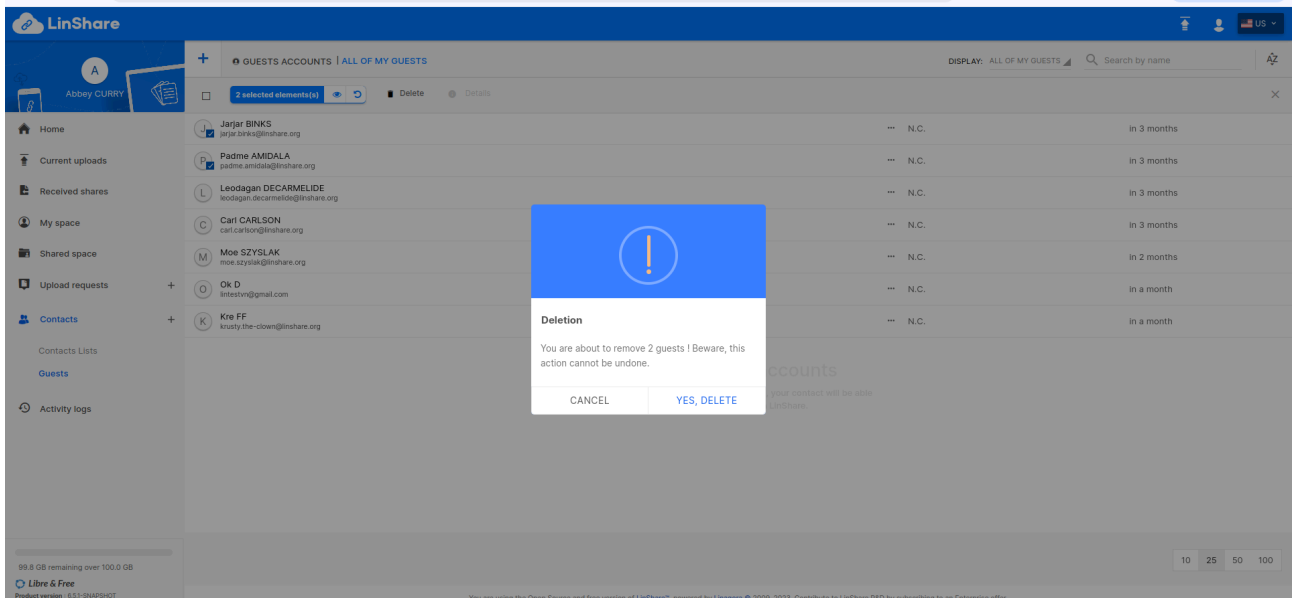

- Click the **three-dot icon (⋮)** next to the guest
- Select **"Delete"**

- **Multiple guests:**

- Use the **checkboxes** to select guests

- Click the **"Delete"** button in the top toolbar

2. Confirm the deletion in the confirmation dialog by clicking **Delete**. A **success message** will confirm the guest(s) have been deleted.

7. Activity logs

The **Activity** section provides a complete view of actions taken on files, folders, shares, workgroups, and users within LinShare. This is essential for tracking usage, ensuring compliance, and maintaining security.

From the left panel, click on "Activity logs", the screen listing activity logs will be displayed:
